Professional Summary

Experienced Senior React.js Developer with 2.5 years of experience in fast-paced environments. Dedicated to delivering cutting-edge web designs, skilled in leading development projects with a focus on creativity and performance. Motivated professional with a background in collaborating on diverse web-based initiatives. Enthusiastic and detail-oriented coder specializing in custom interfaces that prioritize accessibility, usability, and security. Methodical approach to managing multiple deadlines simultaneously, leveraging current tech knowledge to uphold top-tier web design standards.

Education

Year	Degree/Examination	Institution	Percentage
2021	B.C.A (Computer Applications)	Shree Swaminarayan Computer and Science College, Bhavnagar	52%
2014	Class XII	Bhagirathi UttarBuniyadi Vidyalay	54%
2012	Class X	Bhagirathi UttarBuniyadi Vidyalay	49%

Skills

Languages & Frameworks: JavaScript, HTML, CSS, React.js, Redux, Node.js, Express.js
Frontend Tools: Tailwind CSS, Material-UI, Bootstrap, Yup
Backend & AI Tools: REST APIs, Agentic AI (autonomous agents)
DevOps & Deployment: Docker, Git, GitHub Actions (CI/CD pipelines)
Other Tools: Socket.IO, WordPress (CMS), Microsoft Office

Work History

Hexylon Analytics – *Senior React.js Developer*

📌 March 2024 – Oct 2024

Project: ERP System

- Developed scalable UI components using React.js and Tailwind CSS.
- Integrated REST APIs across Inventory, HR, Sales, and Finance modules.
- Implemented complex form validations with Yup.
- Used Redux/Context API for optimized state management.
- Managed user roles with conditional rendering and access controls.
- Collaborated with backend teams for smooth API communication.

Key Learnings:

- Mastered enterprise-level frontend architecture.
- Strengthened debugging and performance optimization skills.
- Improved understanding of clean code, documentation, and modular development.

Additional Contributions:

- Developed autonomous agents using Agentic AI with Node.js.
- Automated internal tasks through agent-based architecture.
- Set up Dockerized environments and CI/CD pipelines with GitHub Actions.

Goldenmace IT Solutions – *Senior React.js Developer*

📌 March 2024 – Oct 2024

- Built interactive UI using React.js for eco-awareness platforms.
- Managed dynamic content using WordPress CMS.
- Promoted eco-friendly practices through tech-integrated design.

Celloip Technology – *Junior Web Developer*

📌 Jan 2023 – Feb 2024

Project: eFone

- Developed chat and call features using React.js, Redux Toolkit, Socket.IO, and Material-UI.
-

BVM Infotech – *Web Development Training*

📌 July 2022 – Dec 2022

- Gained foundational skills in frontend and backend web technologies.
-

Vodafone – *Customer Service Executive*

📌 Aug 2017 – Jan 2018

- Worked in back office Activation Department handling customer onboarding.
-

Internships

Newton School – *Full Stack Web Development Bootcamp*

📌 Nov 2020 – May 2022

- Completed internship with hands-on projects in full stack development.
-

Projects

Zero Heroes

- AI-based eco-sustainability platform.
- *Tech Stack:* React.js, Redux, WordPress, Bootstrap

eFone

- Chat and calling web app.
- *Tech Stack:* React.js, Material-UI, Socket.IO, Redux Toolkit

Breaking Bad Characters App

- Displayed character data using React.
- *Tech Stack:* HTML, CSS, JavaScript, React.js

Mini Projects

- Counter App, Reddit Clone, Netflix Clone, YouTube Clone, Password Generator
- *Tech Stack:* HTML, CSS, JavaScript

Co-Curricular Activities

- Wallyball
 - Cricket
 - badminton
-

Additional Highlights

- Built live projects related to education and chat applications using Socket.IO and React.js.
- Experience creating responsive designs with conditional rendering and media queries.
- Worked on dynamic forms using Yup validation and dynamic component rendering.
- Built a vendor item master form and company master table migration systems.
- Hands-on experience with Agentic AI, including building agents with Node.js.
- Knowledge of DevOps: CI/CD pipelines, Docker, deployment configs.
- Strong grasp of clean, maintainable coding practices and scalable component architecture.
- Excellent communication and collaboration in Agile teams.
